Reissue Application Declaration by the Inventor

At least one error upon which reissue is based is described as follows:

During the prosecution of the application that issued as the above patent, the inventors did not recognize that the features disclosed in the patent at column 12, lines 30-36 were appropriate to claim. As such, the inventor's did not claim all that they had a right to claim. This error was made without deceptive intent. Specifically, the inventors did not claim any one or more of the features of the reflective layer being trimmed by a laser to form a barcode-like trimming pattern or at least one marking.

More specifically, the inventors did not claim any one of the features of trimming the reflective layer of an optical disk to form a barcode pattern, where the barcode pattern is formed on pits functioning as a track on the disk.

I hereby claim foreign priority benefits under 35 U.S.C. §119(a)-(d) or § 365(b) of any foreign application(s) for patent or inventor's certificate, or § 365(a) of any PCT international application which designated at least one country other than the United States, listed below and have also identified below, any foreign application for patent or inventor's certificate, or PCT International application having a filing date before that of the application on which the priority date is claimed:
